

# My Movie Manager

---

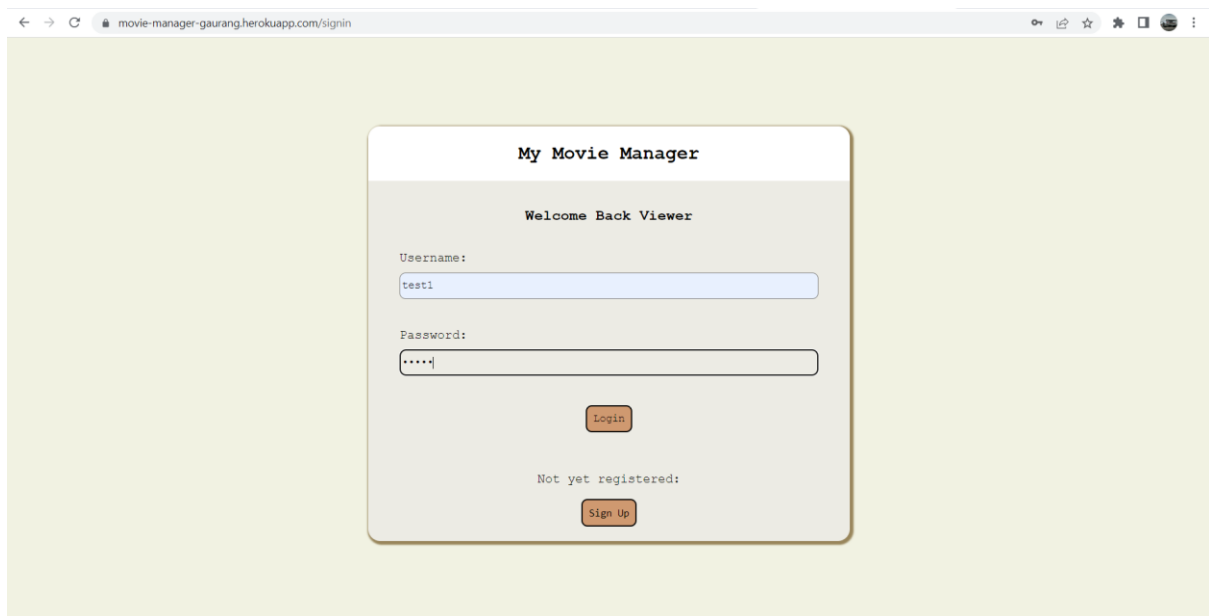

[ <https://movie-manager-gaurang.herokuapp.com> ]

1. On opening the website for the first time, sign in page will be displayed where you can enter your credentials to sign-in.

Sample Credentials:-

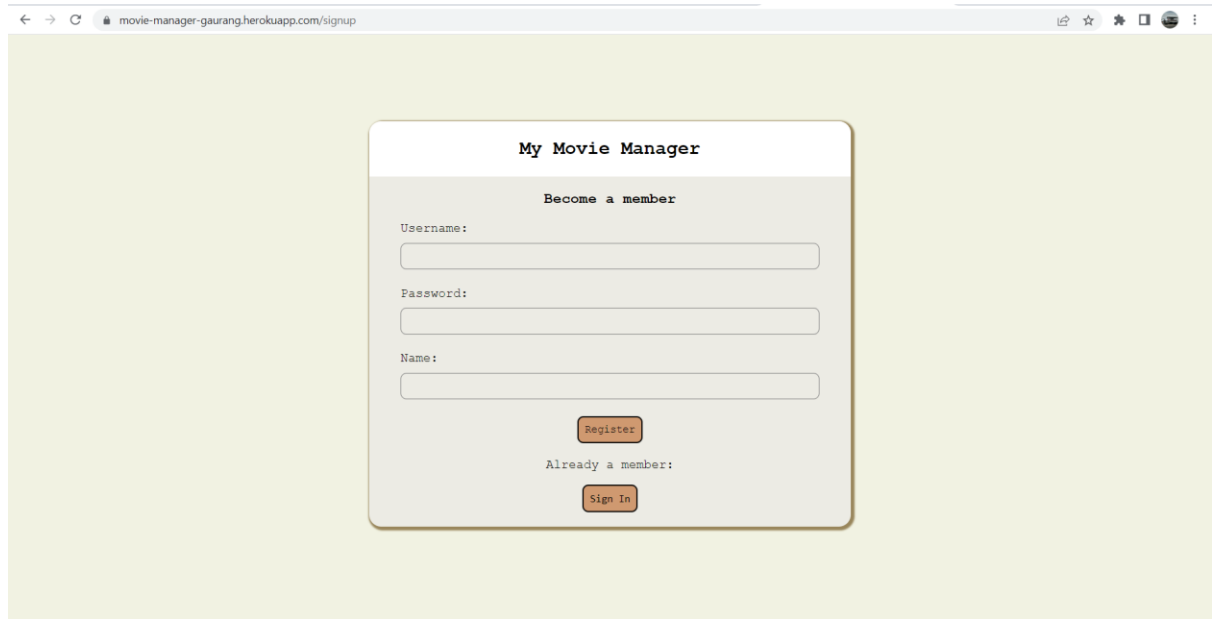

Username: test1

Password: test1

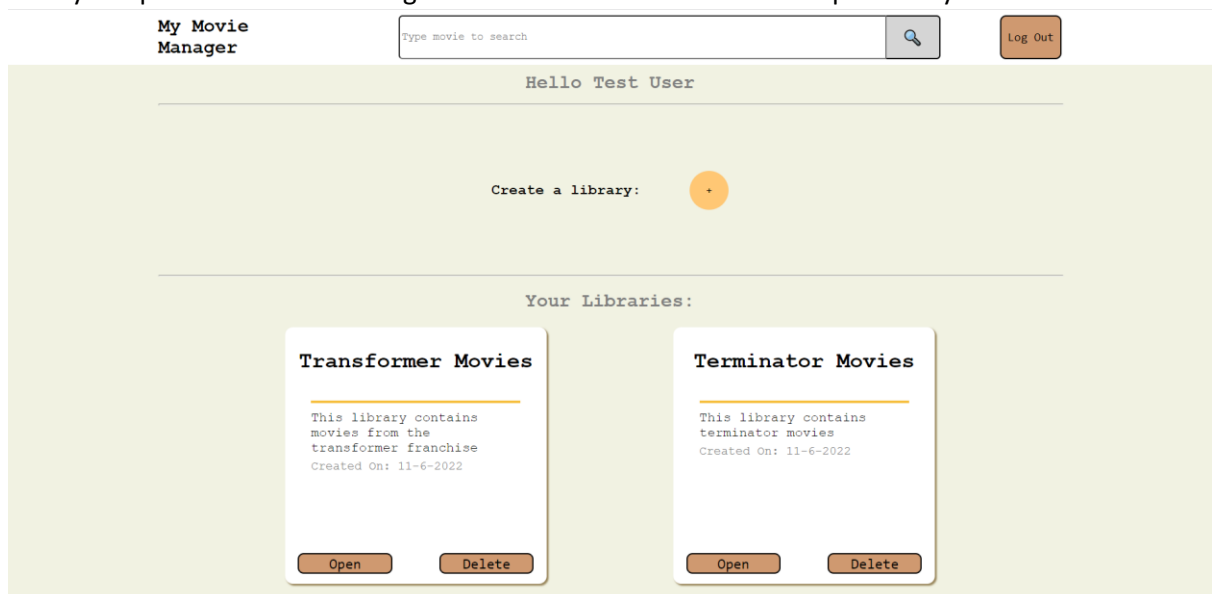

The screenshot shows a web browser window with the address bar displaying 'movie-manager-gaurang.herokuapp.com/signin'. The page has a light green background. In the center, there is a white box with a thin brown border. Inside this box, the title 'My Movie Manager' is at the top. Below it, the text 'Welcome Back Viewer' is displayed. There are two input fields: 'Username:' with the value 'test1' and 'Password:' with masked characters '....'. Below the password field is an orange 'Login' button. At the bottom of the box, the text 'Not yet registered:' is followed by an orange 'Sign Up' button.

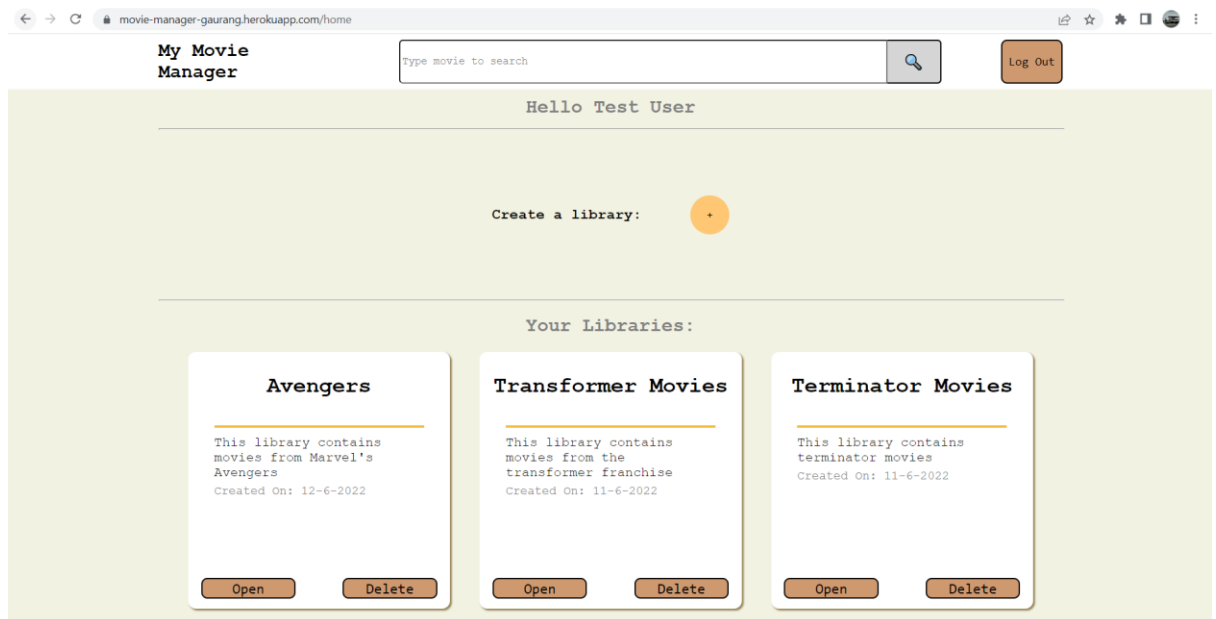

2. OR, click on Sign-up to open registration page.

3. On logging in, the home page will get displayed. The user will have option to create a new library or open and delete existing libraries that the user has created previously.

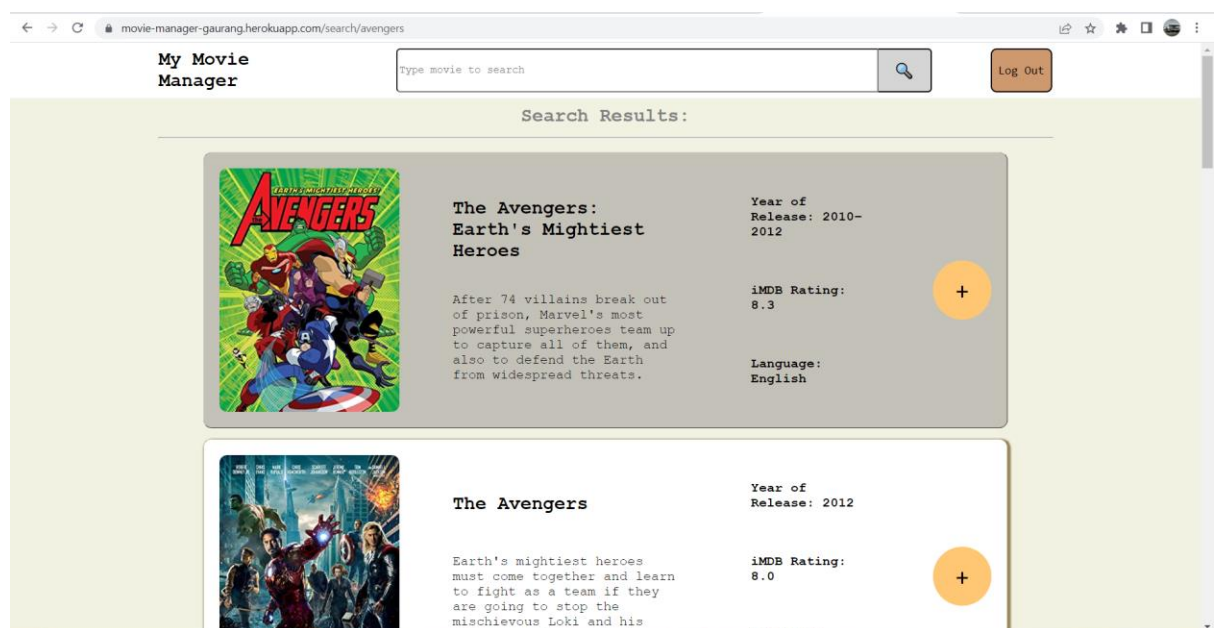

4. Creating a library:  
On clicking the + button, it will ask for Library Name (max 20 characters) and Library Description (max 150 characters). On clicking "Submit", a library will be created.

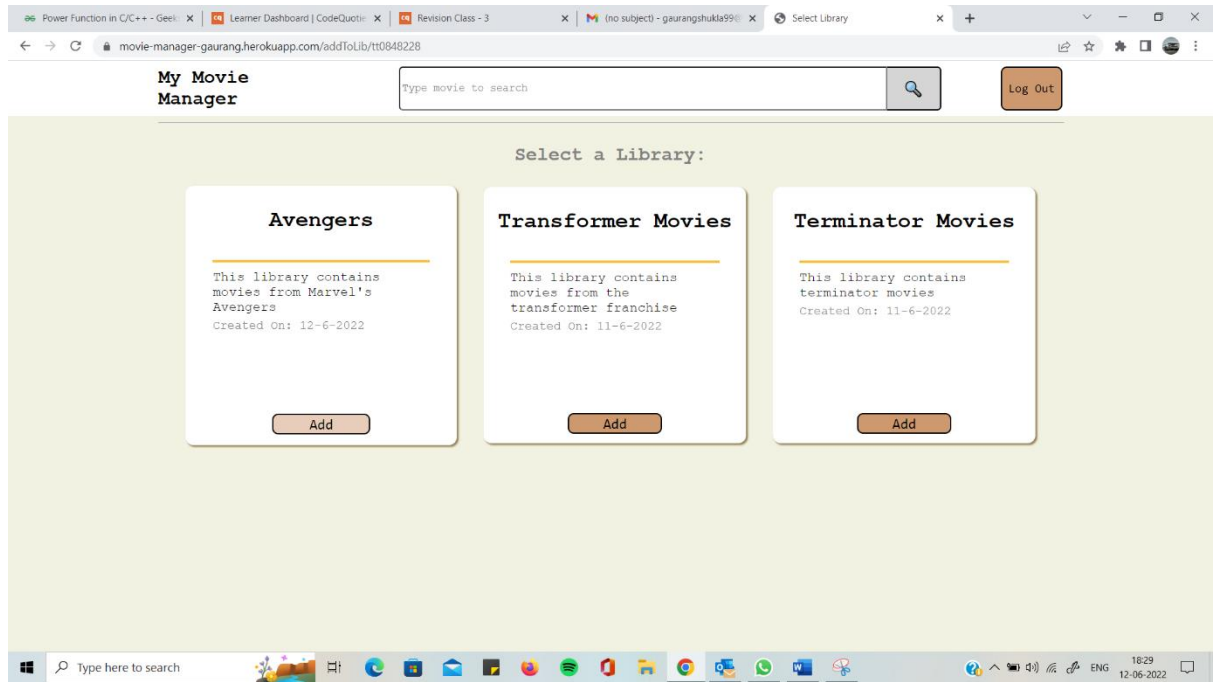

##### 5. Adding movies to library:

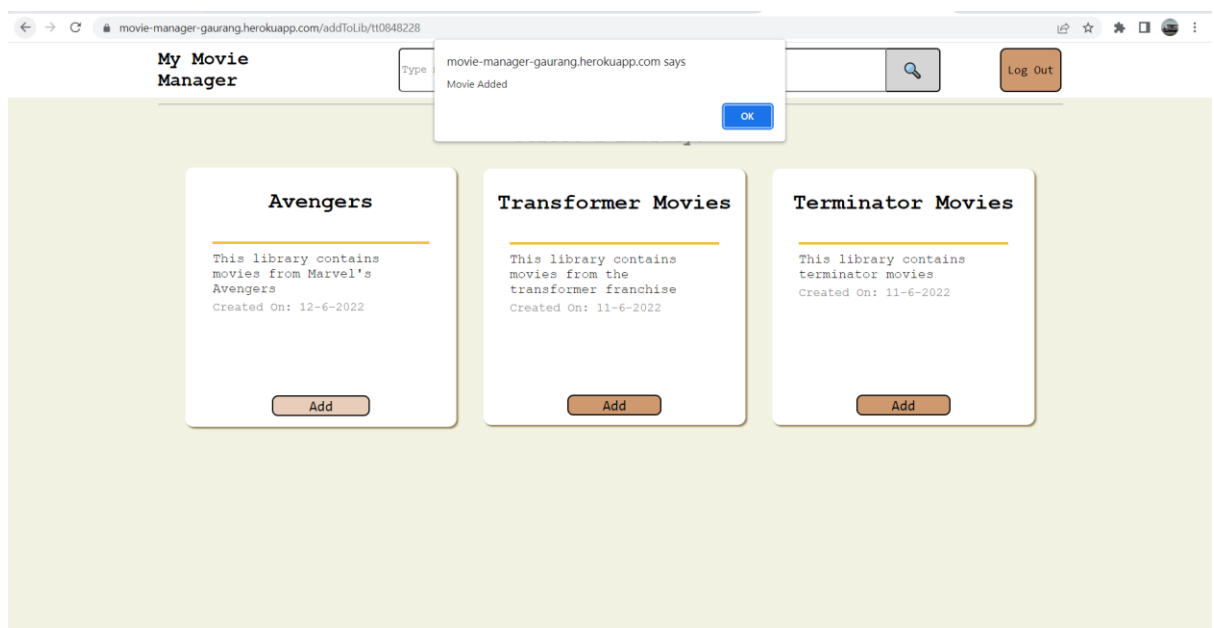

- User can now type the movie name on the search bar that will show at max top 10 results.

- On clicking the plus button for a movie, the user will be directed to library selection page.

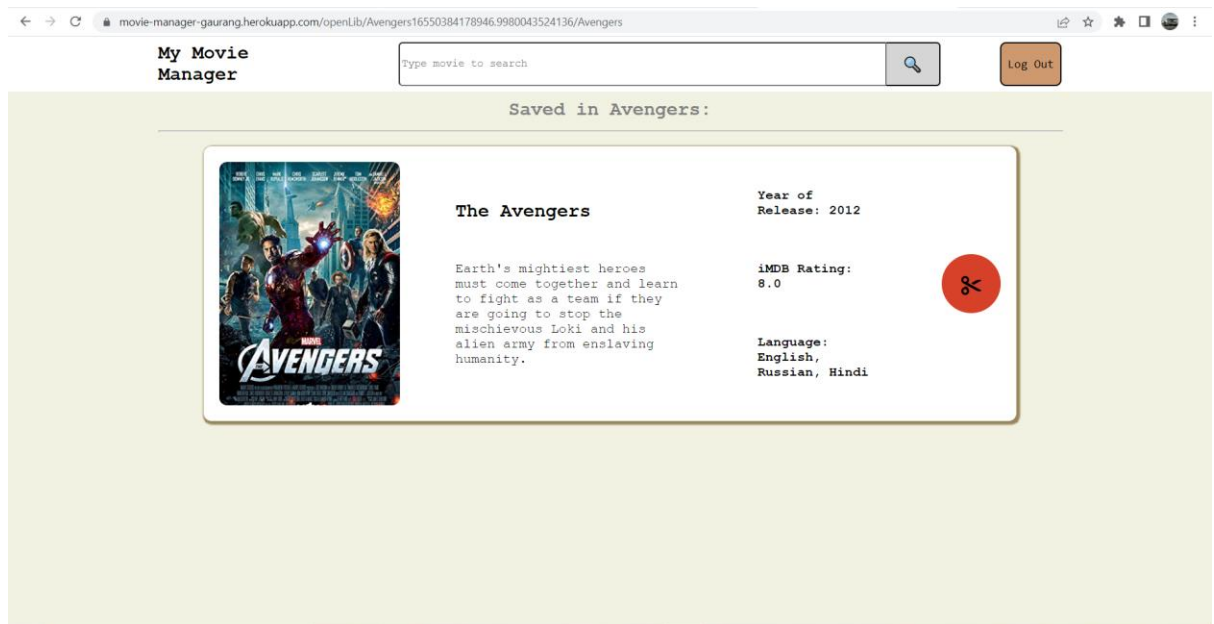

- On clicking Add for a library, the movie will be added to that library.

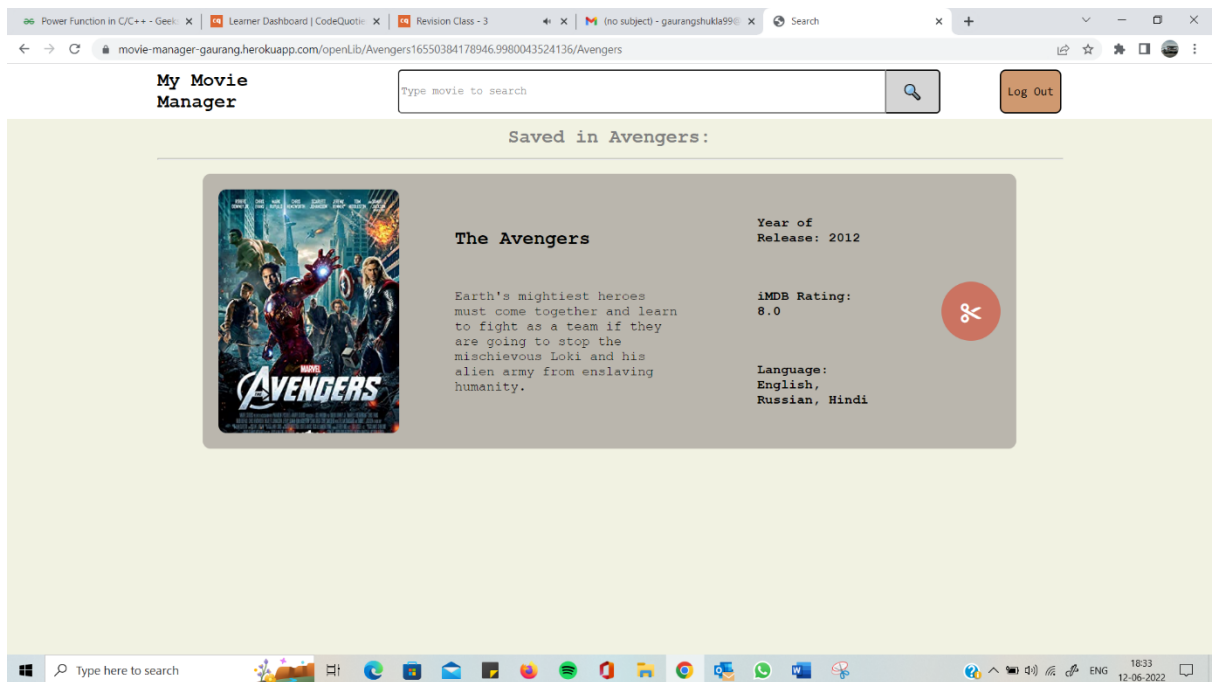

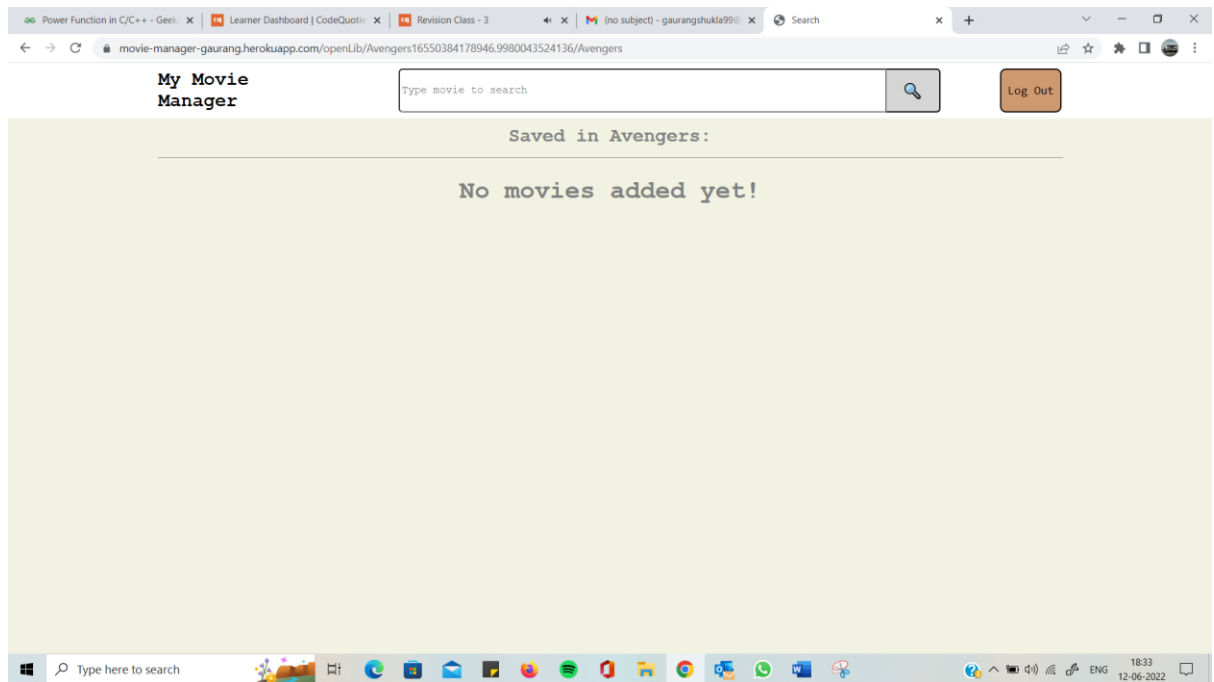

6. Opening a library:

- On clicking open button for a library, the movies stored in that library will be shown.

- On pressing the scissor button, the movie will be removed from the library.

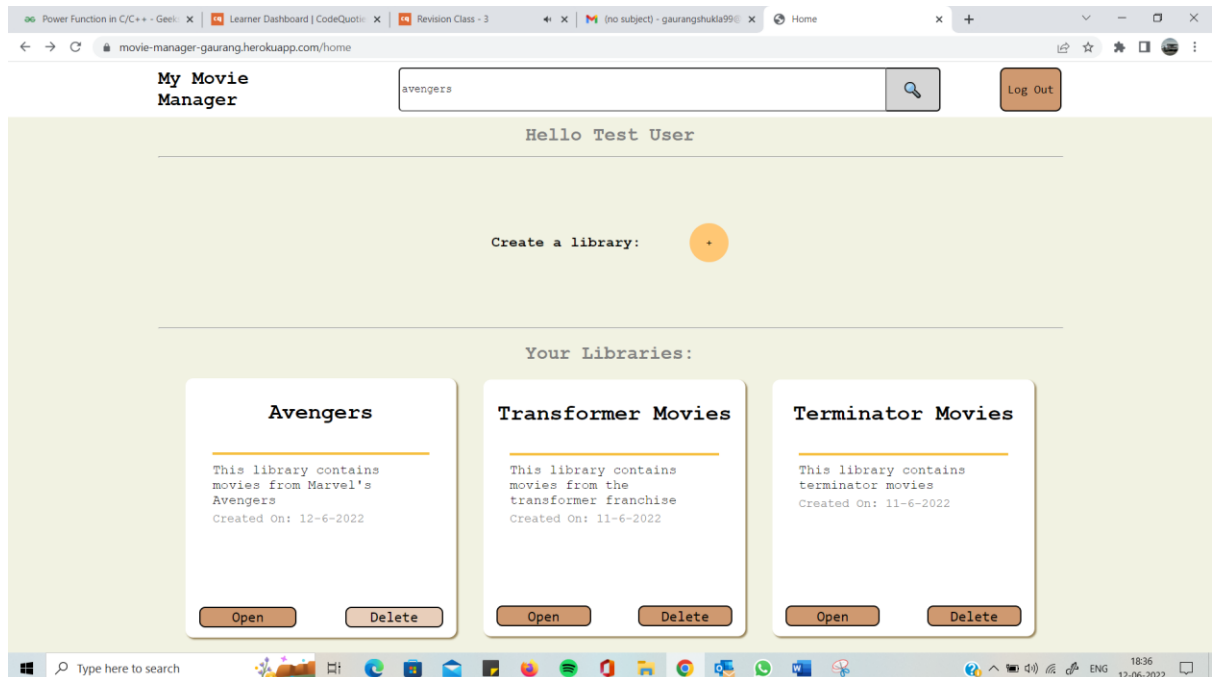

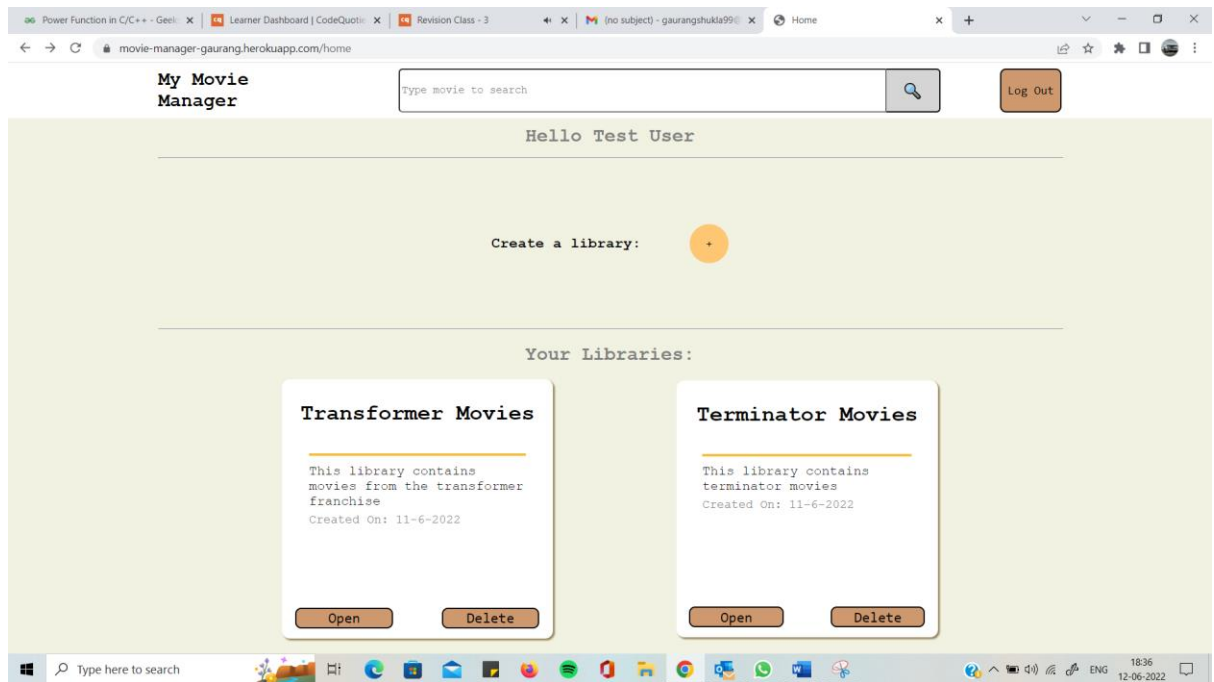

- The movie saved previously is now removed from the library and deleted from the database.

#### 7. Deleting a library:

- On clicking delete button from a library, the library and the movie stored in that library will be removed and deleted from the database.

8. Finally the user can press the “Log Out” button to log out from the application
